Client: A Mid Western State Rehabilitation Commission

This Mid Western State Rehabilitation Commission is the state agency responsible for the mission to help people with disabilities become employed and independent.

One of the Bureau of the Commission handles Disability Determination process, where in claims are reviewed first by an adjudicator and complicated cases are jointly reviewed by a consultant doctor and adjudicator. These consulting doctors are paid through a Consultant Payment System. The client was looking for a reliable partner company to re-design the Consultant Payment System on an AS/400 platform to replace the current WANG based system. Digitek Software helped RSC develop an enhanced Consultant Payment System on IBM AS/400 platform.

In addition, another Digitek team is assisting the client to design and develop a Case Authorization Tracking System which will eventually replace client's current accounting system. The new system is an Object Oriented System based on J2EE and MVC architecture.

Technology Platform: AS/400 (RPG Versions IV, or ILE), Java,J2EE, Rational Tools, RUP, WSAD, WebSphere Application Server.
